 insightful interactive culling

 distributed ediscovery processing

 powering digital review

enterprise

the complete digital discovery platform

ONE PROCESS, ONE PLATFORM

The Ipro Enterprise Digital Discovery Platform is an integrated software solution designed to streamline the discovery process. By combining early case assessment and culling tasks with analytical review and high-speed processing and production, Ipro Enterprise allows law firms to manage electronic evidence collections of vast sizes and complexity levels more efficiently and cost-effectively than ever before.

FULL EARLY CASE ASSESSMENT

Allegro assists firms in gaining quick access to the facts for initial consideration and analysis before reaching the costly stages of litigation processing and review. This insightful interactive culling application helps firms cut through the noise and see the full picture, even when faced with mountains of data. By pinpointing relevant information at the earliest stages of litigation, firms are able to reduce expenses by up to 90%.

ADVANCED ANALYTICAL REVIEW

Eclipse combines proven advanced analytic technology with standard linear workflow to help achieve the most efficient review while gaining the best understanding of your case evidence. Using the advanced analytics functionality found in the Eclipse review application to prioritize and predict responsive documents, law firms are able to complete better reviews quickly and defensibly.

ENHANCED DIGITAL DISCOVERY PROCESSING

eCapture is the industry gold standard for electronic file processing because it is real-world tested and trial proven. It is used daily by law firms, litigation service providers, corporations, and government agencies around the world on the most daunting litigation document collections. eCapture provides users with ultimate peace of mind that all of the electronically stored files will be processed utilizing defensible strategies and advanced technologies.

STREAMLINE YOUR WORKFLOW

Accomplish all litigation tasks, from early case assessment and culling tasks to analytical review to high-speed processing & production, from one platform.

REDUCE YOUR COST

Eliminate the noise found within your document population and get the important documents quicker, saving time and money throughout the litigation process.

MITIGATE YOUR RISK

Ipro's Enterprise Digital Discovery Platform has built-in features to assist with the data management process from beginning to end, including preventing the production of privileged documents to opposing counsel with Ipro's Production Shield.

GAIN THE FASTEST ACCESS TO CASE DATA

In the earliest stages of litigation, it's critical for attorneys to get to the facts of the case quickly in order to develop case strategy, gain an initial estimate of litigation costs, and better prepare for Meet & Confers. Allegro gives law firms quick access to the crucial facts of a case, allowing legal teams to answer important questions like:

- What are the key custodians, terms, and date ranges we should include in our eDiscovery plan?
- Are there any timeline gaps in our collected data which need to be addressed?
- What is the size and scope of the data collection likely moving forward to review?
- What costs would be associated with reviewing said data?

INTERACTIVELY CULL YOUR DATA

To simplify the Early Case Assessment process, Allegro presents data in easy-to-understand graphs, charts, and timelines. Attorneys can use these interactive charts to drill down into specific date ranges, key custodians, or other relevant metadata for a deeper look at the data. By presenting data the way people think, legal teams are able to develop case strategy while removing irrelevant documents from the collection before sending on to full-scale attorney review.

BEGIN NATIVE FILE REVIEW OR ENHANCED DISCOVERY IMMEDIATELY

Allegro is a component of the Ipro Enterprise Digital Discovery Platform, a comprehensive system providing law firms with all the tools they need to address every stage of the litigation lifecycle. After culling, files can be made available in review platform Eclipse for native file review or eCapture for enhanced discovery and document imaging. This is done within the database without creating any new copies of the electronically stored files, saving time and storage costs while keeping the document collection pristine and reducing the chance of errors or missing files.

REDUCE REVIEW COSTS UP TO 90%

By using customizable filtering options and advanced keyword search functionality, litigation teams are often able to reduce data collections to as small as 10% of their previous size, reducing review time and the expenses associated with it.

SOFTWARE BASED

Allegro is software based and can be utilized on your own hardware. Completely scalable to the size of your infrastructure, Allegro can handle any size litigation from several gigabytes to terabytes.

HOSTED OR ON-PREMISES

Allegro can be deployed on premises behind the firewall, in the Ipro Cloud, or in a hosted environment via one of our hosting partners.

ONE PROCESS, ONE PLATFORM

Allegro is the Early Case Assessment component of the Ipro Enterprise Digital Discovery Platform. With the ability to discover native files and forensic images, this comprehensive software package reduces cost of ownership, including training and maintenance, and eliminates the need to copy litigation files across disparate software.

“By using a hosted version of IPRO’s eCapture software in the IPRO SaaS environment, Frommer Lawrence & Haug has lowered our total costs, minimized risks associated with EDD productions, and increased our department’s responsiveness and productivity”

— Caroline DeBonis, Frommer Lawrence and Haug LLP

GAIN CONTROL OF ESI PROCESSING

eCapture is a fully automated, centrally managed electronic evidence processing solution designed to perform electronic data discovery, processing, and production tasks efficiently and accurately. By implementing eCapture rather than outsourcing, law firms can reduce their costs and maintain control of their internal electronic evidence processing, without losing the ability to take advantage of Ipro’s worldwide network of legal service providers or the Ipro Cloud for overflow processing and support.

PERFORM ALL DISCOVERY TASKS FROM ONE SYSTEM

Gain control over large, complex data sets quickly by using eCapture to discover hundreds of different electronic file types in one application. Index, search, and cull your document collections while removing duplicates and system files. Convert the final document collection to TIFF or PDF using eCapture’s high-speed production technology, or autoload into Eclipse, saving time and money and streamlining your internal discovery workflow.

HANDLE ANY SIZE PROJECT

Infinitely scalable, law firms are able to increase production speed simply by adding workstations, not personnel, for virtually limitless processing speed and power to meet the even the tightest deadlines. eCapture is built around a multi-threaded, fully-distributed processing model to ensure maximum productivity at all times.

MAKE YOUR SOFTWARE WORK FOR YOU

The automated workers used by eCapture are self-healing and require almost no human supervision to deliver quality productions, project after project. Begin a production before leaving the office without worrying about gaps in productivity after hours. A feature-rich quality control module then allows QC personnel to validate processed data in batches appropriate for their skill level. To further enhance production quality, eCapture automatically flags documents containing certain characteristics, such as foreign language, for further attention during QC.

ACHIEVE UNPARALLELED FLEXIBILITY

eCapture supports hundreds of file types in their native format for unsurpassed processing flexibility. eCapture can export into all of the popular leading litigation review platforms, including auto-loading into Eclipse and other web-based review tools.

TRIAL-PROVEN CONFIDENCE

eCapture has been used in some of the world’s largest and most complex lawsuits. The application’s transparency and proven defensibility allows you to meet even the most stringent production requirements.

HOSTED OR ON-PREMISES

eCapture can be deployed on premises, in the Ipro Cloud, or in a hosted environment via one of our hosting partners. This flexibility means you don’t need to increase your infrastructure to leverage the limitless processing power of eCapture.

ONE PROCESS, ONE PLATFORM

eCapture is the processing component of the Ipro Enterprise Digital Discovery Platform. This comprehensive software package reduces cost of ownership, including training and maintenance, and eliminates the need to copy litigation files across disparate software applications.

FLEXIBLE PURCHASING AND DEPLOYMENT OPTIONS

The Enterprise Digital Discovery Platform is a comprehensive software package containing Allegro, Eclipse, and eCapture. These applications can be purchased and utilized together or individually for ultimate workflow flexibility. In addition, Ipro offers several deployment options to best meet your firm's IT and budgetary needs.

ON YOUR NETWORK INFRASTRUCTURE

For firms who need and are able to manage the complexities of behind-the-firewall litigation software packages, the Enterprise Digital Discovery Platform can be deployed on your infrastructure and managed by your own internal team. This allows you to maintain complete control of your cases' electronically stored files and attorney work product.

IN A HOSTED ENVIRONMENT VIA AN IPRO CERTIFIED PARTNER

Ipro supports the industry's largest network of partners who have been trained and certified to provide exceptional eDiscovery services to firms choosing to take advantage of Ipro software in a hosted environment. Visit our website for a complete list of Certified Ipro Hosting Partners or look for the "Ipro Certified" logo when researching legal service providers.

IN THE IPRO CLOUD

Ipro Cloud is an innovative service that includes Software as a Service "SaaS" and Infrastructure as a Service "IaaS". Using this model, law firms are able to leverage our state of the art infrastructure in order to reduce the costs associated with staging, storing, processing, hosting, and producing electronically

stored case related information. This allows for advanced, end-to-end eDiscovery delivered seamlessly through the web without the upfront costs of hardware and the personnel to maintain the environment.

All you need is a computer with internet access to get started. With flexible, pay-as-you-go pricing, unlimited scalability, and no costly maintenance or installation fees, Ipro Cloud is perfect for organizations in need of quick implementation for on-demand projects, or for full long term agreements to relocate their Litigation Support environments.

SOFTWARE AS A SERVICE "SAAS"

Ipro SaaS allows your firm on-demand access to the power of Ipro Enterprise software from anywhere in the world. Host case data in Ipro's own secure SAS- 70/SSAE-16 certified environment and simply log on to perform advanced early data assessment, processing, and review with no software installation or IT investment required. This is the quickest and easiest way for a firm to start taking advantage of advanced technology to manage your digital discovery needs.

INFRASTRUCTURE AS A SERVICE "IAAS"

Ipro IaaS allows your firm to relocate all or part of your litigation support environment to Ipro's Infrastructure. Customized specifically for your organization, Ipro can allot any amount of resources including back-up, disaster recovery and a dedicated environment you can call your own.

GAIN ADVANCED DATA INSIGHT FROM ANYWHERE

By leveraging Ipro Cloud to access early data assessment tool Allegro, you can defensibly reduce document collections by up to 90% immediately with no software installation or hardware required.

<http://www.>

COLLABORATIVELY REVIEW USING JUST THE INTERNET

By using Ipro Cloud to access the Eclipse review application, multiple reviewers can securely access case data from just a web browser. Utilize Eclipse analytics such as clustering, threading, and predictive coding for faster, better reviews from anywhere.

HIGH SPEED PROCESSING WITHOUT LIMITATION

Avoid costly outsourcing by simply leveraging the Ipro Cloud to gain access to high-speed processing and production power of eCapture without changing your current IT infrastructure. With unlimited scalability, you can easily increase or decrease your needs depending on the project at hand.

Implemented Worldwide Since 1989

enterprise
the complete digital discovery platform

The logo for 'enterprise' features a small circular icon with a globe-like pattern above the word 'enterprise' in a white, lowercase sans-serif font. Below the word, the tagline 'the complete digital discovery platform' is written in a smaller, white, lowercase sans-serif font.

allegro
insightful interactive culling

The logo for 'allegro' features a small circular icon with a globe-like pattern above the word 'allegro' in a white, lowercase sans-serif font. Below the word, the tagline 'insightful interactive culling' is written in a smaller, white, lowercase sans-serif font.

eclipse
powering digital review

The logo for 'eclipse' features a small circular icon with a globe-like pattern above the word 'eclipse' in a white, lowercase sans-serif font. Below the word, the tagline 'powering digital review' is written in a smaller, white, lowercase sans-serif font.

ecapture
enhanced distributed processing

The logo for 'ecapture' features a small circular icon with a globe-like pattern above the word 'ecapture' in a white, lowercase sans-serif font. Below the word, the tagline 'enhanced distributed processing' is written in a smaller, white, lowercase sans-serif font.
